Education

University of Allahabad — Prayagraj, Uttar Pradesh
Bachelor of Technology in Computer Science and Engineering (JKIAPT) | CGPA: 7.8 — *Aug. 2023 – Exp. 2027*

Technical Skills

Languages: JavaScript, TypeScript, Rust, Java, C, SQL
Frontend: React.js, Next.js, React Native, Redux, Zustand, Recoil, Tailwind CSS, ShadCN UI, Framer Motion
Backend: Node.js, Express.js, MongoDB, Prisma, WebSocket, Redis, PostgreSQL
DevOps & Tools: Docker, AWS, Git, GitHub Actions, Firebase, Supabase, Nginx
AI/LLM: Agents, RAG, Vector DBs, Tool Calling
CS Fundamentals: DSA, OS, DBMS, Networks, System Design, OOP

Experience

Founder — June 2026 – Present
OpenLabs — *Hybrid*
- Founded *OpenLabs*; built interactive landing page and HRMS portal; shipped *College Network*, serving 1000+ students with in-app chat counseling. Close deals with clients and Open Source Program with 10+ contributors.

Full Stack Developer — July 2025 – May 2026
Novastack Solutions — *Hybrid*
- Worked on *Nova Health Care* ecosystem (user, provider, admin apps) using React Native and React.js; built *Novastack Solutions* landing page.
- Developed *Odefi*, a 95% on-chain decentralized staking platform on BNB Chain; implemented SSR, SEO, Next.js client, and admin panel with 5% server dependency.
- Built whole new frontend for *Splosh*; deployed on AWS (1 server, 2 clients) with CI/CD pipeline and Auto Scaling Groups, 400ms server response time for static pages and built admin panel.

Open Source Contributor — Jan 2026
AOSSIE Org — *Remote*
- Participated in GSOC 2026: Improved local development infrastructure by *containerizing* React frontend and Go backend with Docker Compose; built a comprehensive *Go test* suite; fixed *Wayland cursor* operations on Ubuntu.

Projects

Nsh | ***link*** — Dec. 2025
Tech Stack: *Rust, Ratatui, Tokio, Qdrant, AI agent*
- Event-driven Unix terminal runtime, dual-mode scheduler, and an isolated Unix socket AskPass IPC broker with volatile memory zeroization for sudo/SSH/Git.
- Autonomous ReAct agent runtime with two-phase plan and build workflow, multi-grammar tool parsing, recursive @-context traversal, and 128 passing unit/integration tests.

Mudir | ***link*** — Jan. 2026
Tech Stack: *React Native (Expo), TypeScript, Redux Toolkit, Express.js, MongoDB, Better Auth*
- Offline-first system with atomic JSON persistence, debounced Redux storage middleware, and bidirectional cloud sync with conflict resolution to Express/MongoDB.
- Dynamic schema collections with custom multi-type fields, a double-entry financial ledger PDF generation, and Google OAuth session management.

Churn CLI | ***link*** — June 2025
Tech Stack: *TypeScript, Bun, Node.js, EJS, npm*
- A modular CLI scaffolding engine on npm with interactive/flag workflows, EJS templating, Zod environment validation, and TypeScript path alias.
- Matrix code generation supporting 6 ORMs, 4 databases, HTTP/WebSocket protocols, JWT/OAuth auth, and automated Docker with CI/CD.

Achievements

- Top 100 Google Solution Challenge 2024 regional; 2nd place CodeBlock hackathon (50k INR prize); Member at top 300 Builders Community; 20+ global freelance projects
- Participated in Google Summer of Code 2026 in AOSSIE Org; Campus Ambassador E-Cell IIT Bombay (100+ members, 10+ events); GDG Technical Lead (20+ webinars, 500+ students).
